

PRIMA 7548.S - CONCEPT

PRIMA 7548.S - CONCEPT

Engine	Cummins ISX - 14900 cc
Clutch	380mm dia twin disc type
Gearbox	Eaton Ultrashift Plus MXP; Automated Manual Transmission; 18 Forward & 4 Reverse
Rear axle	Tata RA 210 HR-T with planetary hub reduction
Application	Prima 7548.S is a prime mover designed to tow multiple or super-linked trailers. This configuration, which is already in use abroad, is popularly referred to as a road train. Road trains reduce the cost of transportation by providing much higher payloads in a single trip.

FEATURES AND BENEFITS

- 480 HP prime mover capable of pulling more than one trailer : Super- linked trailers/ road trains
- Reduced cost per tonne-Km transported due to increased payload in a single vehicle
- Lesser number of vehicles and drivers to be deployed for any given project
- Ideal applications on which this model can be used :
Containers, Steel coils, Cement bags, Coal transport
