Sc no - 15103

Dear Sirs,

Ref: ISIN: INE155A01022 – Ordinary Shares and IN9155A01020 – ‘A’ Ordinary Shares

Re: Newspaper Advertisement for dispatch of Notice of 73rd Annual General Meeting (AGM) and e-voting Information

Pursuant to Regulation 30 and 47 read alongwith Schedule III of the SEBI (Listing Obligations and Disclosure Requirements) Regulations, 2015 (“the Regulation”), please find enclosed herewith a copy of the advertisement published in today’s Newspapers viz. Financial Express (English) and Loksatta (Marathi) informing about completion of dispatch of Notice of the 73rd AGM alongwith Annual Report for the FY 2017-18 and availability of e-voting facility to the shareholders.

The above information is also available on the Company’s website www.tatamotors.com.

This is for the information of the exchange and the members.

Yours faithfully,
Tata Motors Limited

H K Sethna
Company Secretary
LNG imports jump 20% in H1 of 2018, says S&P Global Platts

The global LNG market has seen a significant increase in imports, with LNG volumes up 20% in the first half of 2018 compared to the same period in 2017. This growth is driven by robust demand in Asia, particularly in China, and rising demand in Europe. The increase is also due to the expansion of existing LNG facilities and the commissioning of new ones. The report also notes that LNG prices have remained stable, with prices in the range of $5 to $8 per million British thermal units (MMBtu). The report predicts that LNG imports will continue to grow in the coming years, driven by the need for more natural gas to meet growing energy demands. The report also highlights the role of spot LNG markets in balancing supply and demand, and notes that the Asian LNG market is poised to lead global growth in the coming years.

LNG imports jumped 20% in the first half of 2018, according to the latest report from S&P Global Platts. This is the largest increase in LNG imports in the last decade, driven by robust demand in Asia, particularly in China, and rising demand in Europe. The increase is also due to the expansion of existing LNG facilities and the commissioning of new ones. The report notes that LNG prices have remained stable, with prices in the range of $5 to $8 per MMBtu. The report predicts that LNG imports will continue to grow in the coming years, driven by the need for more natural gas to meet growing energy demands. The report also highlights the role of spot LNG markets in balancing supply and demand, and notes that the Asian LNG market is poised to lead global growth in the coming years.
