

45X Concept

The futuristic and versatile ‘Agile Light Flexible Advanced’ Architecture $\alpha^{R\&C}$ comes with a radical new approach to design – allows multiple body styles to meet the evolving aspirations of customers in the automotive market. With light weight, modular and flexible characteristics, the $\alpha^{R\&C}$ has the ability to evolve into a range of modern, youthful and agile vehicles in a short development cycle.

The 45X concept is a dynamic hatchback and the first product developed on the new versatile ‘Agile Light Flexible Advanced’ Architecture $\alpha^{R\&C}$. The 45X aims at reinventing the city car design and resetting the rules for the industry catering to the maturing Indian customer. With greater emphasis on bringing connectivity and everyday mobility together, the 45X is an amalgamation of futuristic design, advanced technology, intuitive connectivity and great performance

Key highlights

- Sporty silhouette and aerodynamic lines that give the 45X a feeling of agility
- Signature humanity line accentuated by dual ultra slim LED headlamps, along with a digitally inspired lower grill give the front of the 45X signature look.
- Slingshot line amplified by a chrome finisher that adds uniqueness to the rear of the car.
- Surfboard mounted wing cameras and the dramatic duo tone body flanked by full led tail lamps
- Interiors infused with Indian flavors designed for high pace, connected lifestyle
- Premium details, innovative technologies and extraordinary infotainment experience for indulgent interiors
