

H5X Concept

H5X is a monocoque SUV that provides a glimpse of the future generation of Tata Motors SUV's in terms of design, technology and sheer capabilities. It marries an extremely robust and capable architecture to our future facing design.

H5X will be the first SUV to sport the Impact 2.0 design language. It will offer extraordinary exteriors, intelligently designed plush interiors, future ready connectivity and infotainment. H5X is packed with outstanding ability, performance & durability into its design, which is luxurious yet practical, comfortable yet versatile, power packed yet easy to drive.

H5X is the first vehicle based on our new generation '**Optimal Modular Efficient Global Advanced**' Architecture **Ω R E**, developed in collaboration with Jaguar Land Rover. The architecture is derived from the legendary Land Rover D8 architecture and our engineers have used their keen understanding of the Indian market to adapt it further for Indian conditions. With legendary pedigree running through its veins, the H5X shatters all current benchmarks and paves entirely new standards for SUVs in India.
