

OVERVIEW

DISCOVERY SPORT WITH REDESIGNED MODERN LUXURY INTERIOR, INCREASED VERSATILITY AND STATE-OF-THE-ART TECHNOLOGY

- **Modern luxurious interior:** Redesigned cabin features an elegant 11.4-inch curved glass Pivi Pro² touchscreen with intuitive controls, and class-leading stowage³
- **Occupant wellbeing:** One of the most sophisticated interior air quality technologies in its class promotes wellbeing and heightens driver alertness³
- **Electrified efficiency:** Plug-in electric hybrid and mild hybrid options available, with the P300e offering WLTP-certified electric range of up to 61km (38 miles)⁴ and CO₂ emissions from 33g/km
- **Compelling capability:** Complete more than 90 per cent of average daily journeys in EV mode with next-generation battery chemistry offering an improved expected real-world electric range of up to 47km (29 miles)⁵
- **Rapid charging:** Standard DC rapid charging technology can charge the 14.9kWh battery of the P300e plug-in electric hybrid from 0-80 per cent in as little as 30 minutes⁶
- **Connected convenience:** Software Over The Air⁷ enables download of the latest updates such as apps, maps, software and services, with no need to visit a Retailer
- **All-round vision:** Discovery Sport offers one of the most comprehensive suites of camera technologies in its class³, with ClearSight Ground View^{TM 9} and Rear View¹⁵, plus 3D Surround cameras for supreme manoeuvrability
- **Ready for adventure:** With up to seven seats¹, Discovery Sport combines flexibility, performance, and capability with a range of practical accessories for active families
- **Available to order:** Discovery Sport is priced from £44,790 OTR in the UK. Configure yours at www.discovery/discovery-sport

Gaydon, UK – Wednesday 14 June 2023: Discovery Sport is versatile by design and ready for family adventures, with up to seven seats. A dramatically refined new interior exudes modern luxury, within which clients can benefit from the latest Pivi Pro² infotainment system on an elegant single curved glass touchscreen, as well as all the practical stowage, seat configurations and wellness technologies that make it a favourite among active, modern families.

Luxurious cabin quality comes from finely crafted, tactile materials. The interior feels bright, spacious and airy with stadium-style seating for optimum visibility in all three rows. The optional panoramic glass roof further adds to the sense of space.

Discovery Sport's refined interior features a new gear shifter surrounded by a dark anodised aluminium trim finisher and an elegant three-spoke multi-function steering wheel. Available in soft Windsor leather on HSE, or a leather-free textile on the S and SE, it has buttons that can interact with Pivi Pro or activate a virtual voice assistant. Discovery Sport S and Dynamic SE models feature DuoLeather interiors with up to three colour options. Clients who do not wish to opt for leather can choose Suedecloth paired with the luxuriously soft, non-leather Luxtec, made from recycled polyester microfibre.

Dynamic HSE is available with Ebony Windsor Leather with Lunar Grey contrast detailing on the seats. Alternatively, clients can choose a DuoTone Light Oyster and Ebony trim, offering a distinctive two-tone finish.

Prof Gerry McGovern OBE, Chief Creative Officer, JLR, said: *"Discovery Sport is a characterful, modern, compact SUV, with a versatile interior and intuitive technology – perfect for active family life."*

Available with up to seven seats, the Discovery Sport's versatile and spacious interior ensures generous room and comfort for all, with up to 24 possible seat configurations¹⁴. The second row of seats slides and reclines with a 40:20:40 split, while a load area of up to 1,794 litres with the rear seats folded down accommodates spontaneous adventures. A powered tailgate makes loading and unloading hassle free.

Every Discovery Sport now features a digital instrument cluster and steering wheel-mounted gearshift paddles as standard, while the redesigned and simplified centre console boasts an elegant new floating 11.4-inch curved glass touchscreen. The latest Pivi Pro² infotainment set-up features permanently accessible sidebars, which provide shortcuts to key vehicle controls and functions, such as media, volume, climate and navigation. This allows users to access 90 per cent of tasks within two taps from the home screen.

Convenience comes as standard with Amazon Alexa¹¹ voice AI and Wireless Apple CarPlay^{TM 12} making it easy to control major functions. Android Auto[®] also features as standard for the ultimate connectivity. The redesigned centre console liberates stowage space and accommodates Wireless Device Charging offered as standard, giving Discovery Sport one of the most spacious open front console stowage areas

in its class for superior everyday family practicality³. In addition, two USB-C chargers are available in each row to keep everyone fully connected and charged, with 12V power in the second row and loadspace. Clients who opt for seven seats also benefit from third row climate control and USB-C charging.

James Sanderson, Lifecycle Chief Engineer, JLR, said: *“Discovery Sport now offers a groundbreaking suite of technology features for the whole family thanks to the introduction of the latest Pivi Pro. The reductive new centre console complements the refreshed exterior and liberates even more generous stowage areas. Meanwhile, its range of power options, all-terrain capability technologies and impressive flexibility with up to seven seats mean it is truly capable of taking everything family life can throw at it.”*

Discovery Sport features one of the most sophisticated interior air quality technologies³ available thanks to Cabin Air Purification Plus⁸. With PM2.5 Filtration and CO₂ Management, the system helps to promote wellbeing for the whole family, as well as heighten alertness for the driver by monitoring and controlling CO₂ levels inside. The advanced system combines nanoe™ X technology to combat pathogens and help significantly reduce odours, bacteria and allergens, while the Air Quality Index (AQI) app technology¹⁰ allows clients to monitor outside air quality at their location and their destination on screen.

Discovery Sport also offers one of the most comprehensive suites of camera technologies in its class³. Greater driver reassurance comes courtesy of 3D surround cameras and ClearSight Ground View™⁹ which offer feeds viewed on the 11.4-inch touchscreen, and ClearSight Rear View Mirror™¹⁵ which provides an unobstructed view behind the vehicle, regardless of what is in the back.

The Discovery Sport also features subtle exterior updates highlighting its distinctive Discovery DNA.

Discovery Sport S features full body-coloured lower sills, a new contrasting Gloss Black grille with signature Discovery hexagon motif, Indus Silver skid plates and Bright Atlas Discovery script on the bonnet.

Dynamic models are more assertive and purposeful, with a contrast roof and exterior accents – including Discovery script, grille, lower body sills and lower bumpers – all featuring a distinctive Gloss Black finish. Gloss Black front claw detailing on the bumpers and wheel arches amplifies the purposeful stance, with the three-line signature of the front air intakes a clear Discovery design trademark.

Bold new optional alloy wheel designs include a 21-inch finished in Gloss Black and 19-inch in a Gloss Black or Diamond Turned finish. Varesine Blue is added to the curated exterior paint palette.

Discovery Sport continues to offer a range of efficient plug-in electric hybrid and mild hybrid electric power, delivering efficiency and performance¹³. New battery chemistry on the P300e offers an improved real-world range of up to 47km (29 miles) – enough to do 90 per cent of average daily journeys in hushed electric driving mode. Clients can also rest assured that charging their electric-hybrid is quick and straightforward – a 0-80 per cent charge is possible in as little as 30 minutes with DC charging offered as standard.

The electric hybrid combines an Ingenium 1.5-litre turbocharged three-cylinder engine with an electric motor and 14.9kWh lithium-ion battery, ensuring effortless progress whenever the moment takes you and a WLTP certified electric range of up to 61km (38 miles)⁴.

The P250 and P200 Ingenium petrols and D200 and D165 Ingenium diesels complete the line-up. Across both fuel types, advanced mild hybrid electric technology provides smooth operation of the start-stop function for composed urban driving. Using a belt-driven starter motor and battery pack, energy normally lost under deceleration is harvested, feeding back to a 48-volt battery to boost performance and enhance fuel economy.

The Discovery Sport is available to order priced from £44,790 OTR in the UK. Configure yours now at www.discovery/discovery-sport

ENDS

¹Seven seats not available on plug-in electric hybrid models.

²Pivi Pro features, options and their availability remain market dependent – check with your Retailer for local market availability and full terms. Certain features require an appropriate sim with a suitable data contract which will require further subscription after the initial term advised by your Retailer. Mobile connectivity cannot be guaranteed in all locations.

³When measured against a closed class of competitors as of 03/03/2023.

⁴The figures provided are as a result of official manufacturer's tests in accordance with EU legislation with a fully charged battery. For comparison purposes only. Real world figures may differ. CO2, fuel economy, energy consumption and range figures may vary according to factors such as driving styles, environmental conditions, load, wheel fitment, accessories fitted, actual route and battery condition. Figures shown are for European EU6 markets. Other market fuel economy and range certification and figures published at www.landrover.com or available from your retailer.

⁵Average daily journey length (51km) calculated using InControl data from 30 markets globally for Discovery Sport vehicles between 2019 and 2022. Assumes fully charged battery.

⁶When using a 50kW rapid DC charger. Charging times will vary dependent on many factors, including the age, condition, temperature and existing charge of the battery; facility used and duration of charge.

⁷Software Over The Air subject to driver consent and to network connection and market availability.

Notes to Editors

About Land Rover

Since 1948 Land Rover has been manufacturing authentic 4x4s that represent true 'breadth of capability' across the model range. Defender, Discovery, Discovery Sport, Range Rover, Range Rover Sport, Range Rover Velar and Range Rover Evoque each define the world's SUV sectors, with 80 per cent of this model range exported to over 100 countries.

Important notice

Jaguar Land Rover is constantly seeking ways to improve the specification, design and production of its vehicles, parts and accessories and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this document should not be regarded as an infallible guide to current specifications or availability, nor does it constitute an offer for the sale of any particular vehicle, part or accessory. All figures are manufacturer's estimates.
